Instructions (1) Print this page on A4 paper (2) Cut along the dotted lines to make eight strips (3) Glue or sticky tape the strips together so that the **Notes** Elements with **BLUE** letters are gases, **RED** are liquids and **BLACK** solid at room temperature and pressure. The atomic number tells you how many protons the atoms of each element have - hydrogen atoms **ONLY** have one proton, helium atoms have two and lithium atoms have three protons. Rubidium atoms have 37 protons, iodine atoms have 53 and uranium atoms have 92 protons. **Question** How many protons do gold atoms have?
